

HALL "V"

We newly represent Eko Instruments – a provider of accurate solar sensors for assessment of photovoltaic components and power equipments. Among the innovations are new industrial computers and terminals, spark safe overvoltage protection, manual alarms, LED beacons, sirens, cameras and displays. Furthermore, pressure calibrators, measuring instruments of humidity, temperature, air pressure, CO2 concentration and for measuring and controlling mass flow.

In the Murrelektronik's portfolio you can find a wide range of products designed to maintain a reliable power supply of machines and applications, interface units, LED-signal towers, both passive and active remote I/O modules and myriads of variants of cables and connectors. We offer optimal solutions for your machines and automated processes. We can bring you a significant reduction of expenses as well as competitiveness increase.

EUCHNER

More than safety ! We produce not only electromechanical safety switches, safety relays, transponder coded safety systems and enable switches, but also identification systems, electronic keys systems, joysticks, pendant stations and wide range of precise single plunger and multiple limit switches.

Endress + Hauser

People for Process Automation

Accurate and reliable measuring equipment for all industries. Measurement of level, flow, pressure, temperature, fluid analysis; recorders, communication.
